

Horizon

SPF-200L / FC-200L

Stitcher & Folder / Fore-edge Trimmer

**A4 Landscape booklet
production is available.**

Features

- 1. A4 Landscape Capability** – This new system provides a wide variety of booklet formats including A4 landscape.
- 2. Fully-automated Setup** – All necessary settings can be performed automatically through the touchscreen display. Even the fold roller gap adjustment is automated. It allows operators of all skill levels to produce professional quality books.
- 3. Reliability** – System is designed based on the popular SPF-200A bookletmaking system for reliable and durable construction and ease of operation.

The popular SPF-200A bookletmaking system is entering a new stage with A4 landscape capability.

Stitcher & Folder SPF-200L

- Fine adjustments can be performed on-the-fly to insure high quality finishing.
- VAC-1000L can be connected for conventional offset print production and the HOF-400 Digital sheet feeder can be connected to handle digital print production.
- The 10.4 inch color touchscreen is intuitive and icon-based for user-friendly operation.
- 200 job settings can be entered and stored alpha-numerically, for quick easy search and retrieval.

Fore-edge Trimmer FC-200L

- A powerful and efficient servo-motor is employed for knife driving to provide high speed and sharp fore-edge trimming.
- Durable cast construction for high reliability and performance.
- Errored sets are sent to the reject tray so that only the correct booklets are delivered to the conveyor.

Collator VAC-1000L

- Horizon's unique suction rotor feeding system can feed a wide variety of paper stocks. Even signatures can be fed consistently. The feed wheel employs a special, highly durable rubber for totally mark-less feeding.
- Frequently operated buttons are arranged on a wireless remote control, which is included as standard. The remote provides for collating speed adjustment and start/stop/jog operation, and lets you monitor the feeding or delivering conditions.
